

What is IMUG?

IMUG (Information Management User Group) is a non-profit organization based on voluntary work. The goal is to bring Information Management Users together on a regular base to exchange experiences and to network.

The IMUG mission statement

IMUG aims to be the cross-brand, cross-application User Group in the Information Management space.

How to achieve this?

IMUG will organize 2 to 3 meetings a year around an Information Management related topic.

Examples of topics:

- Data Modeling
- Data Warehousing
- Data security
- Test data management
- Change management
- Data management (normalization, ...)
- Data Quality (quality, redundancy, ...)
- Data Movement (placement, architecture, ..)
- Data Archiving (legal aspects, ways to do this, ...)
- Data Integration (data sources, API's, connections, ...)
- Business Intelligence (reporting, dashboarding, data mining, ..)
- High Availability, Disaster Recovery, Clustering, Replication architecture, Performance
- etc ...

The speakers are all users sharing their company's approach of the subject towards vendors, products and choices made (who does what with which product?).

Target audience: Enterprise Architects, Data Architects, Content or Information Architects, Consultants, Database Administrators, Developers, Program & Project managers, IT Managers, Chief Information Officers, etc ...

IMUG membership

IMUG membership & event participation is free of charge. Register as IMUG member via <http://www.imug.be/register.asp> and receive notifications for upcoming events.

If you are member of the LinkedIn community, you're welcome to join the IMUG group: <http://www.linkedin.com/groups?viewMembers=&gid=2069967&sik=1250173958601>
